

# Iteration Plan - Inception 2

“You Might Also Like...”

## 1. Key Milestones

Milestone	Date
<i>Iteration start</i>	28/03/2017
Have completed all major inception artefacts for the LCOM	07/04/2017
<i>Iteration stop</i>	11/04/2017

## 2. High-level objectives

Complete all major inception artefacts for the LCOM:

1. Project vision
2. Initial requirement model
3. Proposed architecture
4. Technical competency demonstrated
5. Risk list artefact completed
6. Master test plan artefact completed
7. Initial project plan
8. Inception phase project status assessment

## 3. Evaluation criteria

1. All work items listed below have their outcome completed (the artefacts are made and documented).

For more specific evaluation - see ITC303 Subject Outline: “Assessment item 2”’s marking criteria

## 4. Work item assignments

Item ID	Name/ Keywords	Outcome	State	Assigned to	Estimated hrs	Hrs worked	Est. hrs remaining
1.1.	Project Vision	A clear project vision document that can be understood by stakeholders is created and documented	<a href="#">Complete</a>	Hugh	3	3	0
2.1.	Initial Requirement Model	A complete ( <i>in the system's current state of planning</i> ) requirement model document is created and documented.	<a href="#">Complete</a>	Shailesh, Somer	3	3	0
2.2.	Use-case Model	A complete use-case model is created and documented	<a href="#">Complete</a>	Somer	2	3	0
2.3.	Domain Model	A complete domain model is created and documented	<a href="#">Complete</a>	Somer	3	3	0
2.4	NFR list	A concise NFR list is established and documented	<a href="#">Complete</a>	Shailesh	3	3	0
3.1.	Proposed Architecture	A complete software architecture document is created and documented	<a href="#">Complete</a>	Erin	3	3	0
4.1.	Technical Competency Demonstrator	An integrated application demonstrating most aspects of the chosen architecture working together exists and the development files for this demonstration are versioned	<a href="#">Complete</a>	Erin ( <i>And other team members to demonstrate their ability to use the architecture themselves</i> )	9	9	0
4.2.	Demonstrate development environment	Every team member demonstrates their ability to setup and use the development environment	Complete	Erin, Hugh, Shailesh, Somer	3	3	0
5.1.	Risk List	A comprehensive set of project specific risks are identified, discussed and prioritised with specific mitigation strategies	<a href="#">Complete</a>	Hugh	3	3	0
6.1.	Master Test Plan	An overall testing strategy is established and documented - being specific and specifying types of testing to be undertaken, their basic techniques, etc	<a href="#">Complete</a>	Erin, Shailesh	4	4	0

7.1.	Initial Project Plan	A project plan outlining the foreseeable high level objectives for the future iteration plans of the project and the architectural elements and functional elements of the project that will be delivered during those iterations	<a href="#">Complete</a>	Somer	3	3	0
8.1.	Inception Phase Project Status Assessment	A document outlining the team's progress toward the completion of the inception phase is created, referencing specific artefacts and	<a href="#">Complete</a>	Somer	2	2	0

## 5. Issues

Issue	Status	Notes

## 6. Assessment

Assessment target	LCOM completed
Assessment date	11/04/2017
Participants	Erin, Hugh, Shailesh, Somer
Project status	Green

- **Assessment against objectives**  
All work items were completed, and the LCOM was finished successfully
- **Work Items: Planned compared to actually completed**  
All work items were complete, though some further work toward expanding on work item 4.2. is needed and planned for the next iteration.
- **Other concerns and deviations**
  - Almost all work items were completed within the last day before the LCOM was due to be completed.
