Scenario #6: Configure Genre Characteristics via Admin page on YMD

Description

This test scenario covers a user attempting to configure a genre

The test scenario covers a user applying further configurations to a genre

- Blacklist a Genre - is which genres you want to hide any games that are part of that genre
- Hidden Genres - hidden is just hiding those genres themselves
- Evaluates overall user experience of browsing to the configuration page once signed in and saving the selected preferences.

Test Scripts

The following scripts will cover this scenario:

- 6.1. Blacklisted Genre
- 6.2. Hidden Genre
- 6.3. No Changes made / Cancel Changes
- 6.4. Changes reflected on the user settings overview via admin
- 6.5. Add Genre Characteristics

Use Case

When User
Wants to change the Genre Configuration, and fill out the requested information
So that the User is granted an account with a specific Genre configuration where a user want to hide any games that are part of that genre or hide genres themselves
Extends use-case (Login)

Test Components/Requirements

This test scenario covers the following high-level test requirements (see scripts below for specific requirements covered by each test script):

- Authentication
- Persistence

User Groups

- Average user

Script 1: Blacklisted Genre

Description

- An unauthenticated user will visit a page of the site where the navigation bar is offered (currently all pages)
- Attempt to blacklist a genre i.e. hide any games that are part of that genre
- Observe the result - The user should then have blacklisted genre updated and saved via saving preferences and the user settings is automatically updated and the games visible to the user is less the blacklisted genres games

Setup

- The testing user should ensure they are logged in
- The testing user should ensure that the genres they are blacklisting are not the ones that are already blacklisted or there are no blacklisted genres at all saved prior to this attempt

Step #	Test Step	Expected Test Results	P	F
1.	Visit the site	Site loads with no errors		
2.	Click "Sign up" or "Sign in" in the top right	A modal window appears asking for registration details or log in details		
3.	Once logged in Click "Admin" in the top right	A modal window appears providing admin over view details and options to configure Genre and Characteristics on the left hand side of the modal window as options		
4.	Click "Genres" in the modal window located on left hand side presented as options	The page refreshes and the modal window displays options to black list a genre or hide a genre via ticking a box on the left hand side of genres presented as an option to the user		
5.	Select "Genres" in the modal window via a tick box located on the left hand side presented as options under blacklist genres and then Click "Save" in the modal window at the bottom of the page	The page refreshes and an information pop up shows that "Blacklisted genres have been updated"		
6.	Click "On YMD home page" in the modal window while still signed in	The YMD homepage has filtered the blacklisted genres

***You probably notice that it is impossible to tell whether the blacklisted or hidden genres have been updated. Hence the test has failed the UAT

Script 2: Hidden Genre

Description

- An unauthenticated user will visit a page of the site where the navigation bar is offered (currently all pages)
- Attempt to hide a genre i.e. hide the genres themselves
- Observe the result - The user should then have hidden genres updated and saved via saving preferences and the user settings is automatically updated and the games visible to the user is less the hidden genres games on home page

Setup

- The testing user should ensure they are logged in
- The testing user should ensure that the genres they are hiding are not the ones that are already hidden or there are no hidden genres at all saved prior to the attempt

Step #	Test Step	Expected Test Results	P	F
1.	Visit the site	Site loads with no errors		
2.	Click "Sign up" or "Sign in" in the top right	A modal window appears asking for registration details or log in details		
3.	Once logged in Click "Admin" in the top right	A modal window appears providing admin over view details and options to configure Genre and Characteristics on the left hand side of the modal window as options		
4.	Click "Genres" in the modal window located on left hand side presented as options	The page refreshes and the modal window displays options to black list a genre or hide a genre via ticking a box on the left hand side of genres presented as an option to the user		
5.	Select "Genres" in the modal window via a tick box located on the left hand side presented as options under hidden genres and then Click "Save" in the modal window at the bottom of the page	The page refreshes and an information pop up shows that "blacklisted genres have been updated"		
6.	Click "On YMD home page" in the modal window while still signed in	The YMD homepage has filtered the hidden genres

Script 3: No Changes made / Cancel Changes

Description

- An unauthenticated user will visit a page of the site where the navigation bar is offered (currently all pages)
- Attempt to black list or hide a genre and then do not save the changes
- Observe the result - The user should then be able to close browser or simply go back and without saving and have no changes reflected in admin or user settings

Setup

- The testing user should ensure they are logged in
- The testing user should click on blacklisted and hidden genres on the configure genre page. However, should not save the preferences and leave the portal or simply close the window

Step #	Test Step	Expected Test Results	P	F
1.	Visit the site	Site loads with no errors		
2.	Click "Sign up" or "Sign in" in the top right	A modal window appears asking for registration details or log in details		
3.	Once logged in Click "Admin" in the top right	A modal window appears providing admin over view details and options to configure Genre and Characteristics on the left hand side of the modal window as options		
4.	Click "Genres" in the modal window located on left hand side presented as options	The page refreshes and the modal window displays options to black list a genre or hide a genre via ticking a box on the left hand side of genres presented as an option to the user		
5.	Select "Genres" in the modal window via a tick box located on the left hand side presented as options under blacklist and hidden genres and then DO NOT Click "Save" in the modal window at the bottom of the page instead close the window or click the back button. Sign back in.	There are no updates made to the user settings or to the admin details		
6.	Click "On YMD home page" in the modal window while still signed in	No changes have been made to the games that are displayed to the user
